 - Minnesota Petrofund Reimbursement Coordination

OUR APPROACH:

From system design, to construction management, to compliance testing, Pinnacle has a long and proven track record of helping hundreds of clients deal with the multitude of issues associated with owning and operating tank systems. Our full service team of engineers, geologists, and technicians coordinate efforts, addressing contamination, geotechnical, containment, and structural issues - achieving compliance without duplication of effort.

BENEFITS TO YOU:

- We can help bring your facility into compliance. Pinnacle's knowledge of compliance issues and regulations will help you stay current with Federal and State programs.
- Our competent staff take the time to explain specific regulations and regulatory implications that may impact your project - helping you understand your facility's own compliance needs.

PINNACLE SOLUTIONS:

Pinnacle upgraded a southeast Minnesota power utility's bulk storage facility. By evaluating the secondary containment area, conducting API Standard 653 inspections, and upgrading as necessary, the facility met the 2003 compliance criteria.
