

Air Quality

“The Clean Air Act Amendments of 1990 brought promise of fewer toxins polluting our air. Instead ‘permits to pollute’ brought more regulations, more paperwork, and more testing.”

SERVICES:

- **Permitting**
 - Air Emission Assessments
 - Permit Applications
 - Renewals
 - Amendments
 - Ventilation Hood Certifications
- **Permit Negotiations**
- **Permit Compliance**
 - Compliance Assessments
 - Deviation Reports
 - Emission Inventory Reports
 - Calculations
 - Monthly Emission
 - 12-month Rolling Sum
 - Specific Facility Requirements
- **Risk Management Program**
(Section 112)
- **Air Emission Control and Process Engineering**
 - Volatile Emissions
 - Particulate Emissions
 - Process Recommendations
 - Air Pollution Control Systems
 - Feasibility Studies
 - Material Substitution
 - Process Engineering
 - Pollution Control Equipment
- **Major Source Permitting**
 - Air Dispersion Modeling
 - NSR-BACT-PSD-MACT-CAM-LACT
- **Regulatory Negotiations**
(Stipulation Agreements)
- **Pollution Prevention Planning**

OUR APPROACH:

As a highly recognized regional leader, Pinnacle helps clients plan and maintain air quality standards that meet increasingly stringent federal, state, and local regulatory requirements. We will identify and analyze various operational alternatives that might be used to reduce your air permit requirements. Pinnacle also utilizes the latest Federal rules and regulations software to quickly and accurately track regulatory trends, anticipate relevant issues, and respond effectively.

BENEFITS TO YOU:

- With experience in 31 states, Pinnacle has written over 500 air permits for manufacturing and industrial facilities. Currently, we are involved in the on-going management of these permits for a number of clients.
- From the small business to the Fortune 500 company, Pinnacle works with you to help you understand, determine, and remedy your specific air quality needs and regulatory compliance requirements, leaving you with a sense of security in knowing your air quality issues are being handled properly.

PINNACLE SOLUTIONS:

- Pinnacle brought a major printing company into compliance with clean air act requirements at approximately 30 facilities in 20 states in a 12 month period.
- Pinnacle assisted a major metal finishing client with emissions calculations and dispersion modeling. The services were required due to a regulatory threat of shutting down a facility employing over 750 people.
