

Greenhouse Gas Emission Management

“Environmental awareness and stewardship are becoming increasingly important as the impacts of climate change, greenhouse gas (GHG) emission regulations, and GHG markets continue to establish themselves. Prepare for the future by sustaining it.”

SERVICES:

EPA REGULATION

- GHG Tailoring Rule Compliance
- Mandatory GHG Reporting Rule Compliance
 - * Electronic GHG Reporting tool (e-GGRT)

VOLUNTARY MARKETS

- Carbon Strategy
- Carbon Footprint & GHG Accounting Systems
 - * Organizational boundaries
 - * Identifying Emissions Sources
 - * Quantification Methods
 - * Activity Data Tracking
- GHG Reduction Projects
- Registry Assistance
- Pre-Certification Audits

OUR APPROACH:

Pinnacle's staff of trained professionals take great pride in partnering with our clients to help them quantify their GHG emissions and assist them in development of their GHG strategy. We understand your concern about the environment and regulated GHG emissions. Our program will help you prepare for the GHG constrained future.

BENEFITS TO YOU:

- Regulatory Compliance
- Long Term GHG Strategy
- Credit for Early Action
- Competitive Economic Advantage
- Readiness for GHG Trading
- Readiness for GHG Constrained Future
- Stewardship & Recognition as an Environmental Leader

PREPARING FOR THE FUTURE:

While the rigorous nature of registries may not fit a client's current needs, Pinnacle can help provide the GHG strategy frame work now. Thus, as a situation or need changes, the existing GHG emissions inventory can be used to pursue active rolls in GHG emission registries without investing a significant amount of time or expense.

ARE YOU READY?

The Mandatory GHG Reporting Rule and GHG Tailoring Rule apply initially to the largest and GHG intensive industrial facilities. Let Pinnacle help you determine if your facility is covered by the new rules and provide you with complete compliance support.
