

# Health and Safety Management

*“Safety is not always the most important thing on an employee’s mind. Health and Safety Management is all about anticipating and preventing dangerous situations.”*

## OUR APPROACH:

Pinnacle will assist in your efforts to ensure employee safety with a Health and Safety Management program customized for your operation. We tailor the program to meet the needs of your workplace.

Our health and safety engineers provide information on current regulations; assist your staff in maintaining compliance information; and evaluate how new standards impact your operations.

## SERVICES:

- **Industry Compliance Programs**
  - OSHA Assessments
  - Training
  - Management Systems
  - Benchmarking
- **Loss Control/Injury Prevention**
  - Health & Safety Inspections
  - Machine Guarding Assessments
  - Job Hazard Analysis
  - Ergonomics/Office Functionality
- **Hazardous Materials Management**
  - Process Safety Management
  - HazMat Code Assessments
  - Storage Room Design
  - Chemical Management Plans
  - Chemical Hygiene Plans
- **Industrial Hygiene Training**

## BENEFITS TO YOU:

Most importantly, we help you by providing the necessary guidance to develop and maintain a compliant, healthy and safe workplace. A safer workplace equates to cost savings through *lower absenteeism, fewer Worker’s Compensation claims* and overall *more productive employees*.

## PINNACLE SOLUTIONS:

- Pinnacle developed and implemented a Process Safety Management Program for a cabinet manufacturer’s paint and solvent storage, and distribution system.
- Pinnacle conducted facility regulatory assessments for industrial clients; and developed and wrote process safety management plans for the storage and use of hydrofluoric acid, flammable liquids, and propane. Our engineers assisted these clients in responding to multimedia enforcement actions, the negotiations of those actions, and directing the facility follow-up to internal and external regulatory audits.
