

Industrial Hygiene

“Industrial Hygiene is that science and art devoted to the anticipation, recognition, evaluation, and control of those environmental factors and stresses, arising in or from, the workplace.”

SERVICES:

- OSHA Compliance Evaluations
- IAQ Investigations/Monitoring
- Chemical Exposure Monitoring and Control
- Mold and Biological Contaminant Monitoring
- Carbon Monoxide Monitoring
- Ventilation Design/Evaluation
- Confined Space Classification
- Feasibility Studies
- Noise Surveys/Control
- Asbestos Sampling
- Asbestos Management and Planning
- Supplied Air Testing
- Respirator Training and Fit Testing

OUR APPROACH:

At Pinnacle, we think Industrial Hygiene is more than just sampling and site walk-throughs. Our staff can help you evaluate potential areas of concern, conduct testing, study the results, and recommend, design, and implement compliance strategies for your workplace. Our services provide our clients with the tools needed to evaluate and control worker exposure to hazardous atmospheres.

BENEFITS TO YOU:

- Pinnacle’s staff of industrial hygienists and engineers bring their experiences together, offering clients a complete overview of your facility status.
- We provide our clients with the tools needed to evaluate and control worker exposures - minimizing accidents, reducing downtime, and maintaining compliance.

PINNACLE SOLUTIONS:

- Pinnacle assisted a local industrial facility in evaluating and controlling employee exposures to heavy metals, and assisted the facility in achieving and maintaining environmental compliance. Pinnacle also acted as a regulatory liaison during enforcement actions.
- Our engineers completed environmental audits for a large automotive electronics firm and their six local facilities; and developed and implemented Environmental Compliance Plans to assist the facilities in achieving and maintaining compliance.
